

**!!!MANIC Salamander**

**8mm- style Bar-End Weights**

**!!!MANIC Salamander**

## **How to install your 8mm- style Bar-End Weights**

These units are made to bolt right onto the end of your handlebars, where the OEM weights went.

These units were designed for the Kawasaki Concours, Ninja 250, Ninja 500, EX250, EX500, ZX-12 and ZRX1200, all years.

If you add the right number of flatwashers, and supply the right length of screw, they will fit in the place of any weight that attaches with an 8mm bolt.

Simply unbolt the old weights, and bolt on the new. Easy!

Please let me know what you think of the product, we are always looking for ways to improve.
